Space & Naval Warfare Systems Command Awards Contract

SAN DIEGO — ACS Technologies, Inc. (Titan Systems Corporation) of San Diego, Calif., is being awarded an initial delivery order valued at \$1,551,047 under one of two Indefinite Delivery Indefinite Quantity firm-fixed-price contracts for integrated hardware for the Navigation Sensor System Interface (NAVSSI) and the NAVSSI Lite. The NAVSSI Program of Record provides the U.S. Navy precise navigation and time distribution capability for command and control, combat and combat support, common operational picture and other navigation mission packages. The NAVSSI Lite is a low cost variant of the NAVSSI system that provides ships with an electronic navigation capability. The contract allows cumulative order quantities of 165 new production ship sets and 240 technical refresh and system modification kits as well as integration and installation support. This contract includes options, which if exercised and if the five-year projection is all ordered under this contract, would bring the cumulative value of this contract to approximately \$17,300,000. This contract combines purchases for the U.S. Navy (92.0%) and the governments of Korea (6.0%) and Japan (2.0%) under the Foreign Military Sales Program. Work will be performed at contractor's facility in San Diego, Calif., and is expected to be completed by March 2008. Contract funds will not expire at the end of the current fiscal year. This contract was procured via full and open competition through the SPAWAR E-commerce website. An unknown number of offerors were solicited and five proposals were received. The Space and Naval Warfare Systems Command, San Diego is the contracting activity (N00039-03-D-0006).
